

Plastique Fantastique Tenth Communiqué: Protocols for Deceleration

A deceleration is called for; a 'switching off', a prolonged hesitation. An 'unplugging' as they say. Laptop entrepreneurs, creative partnerships and project managers: BEWARE! Your time is at hand. Plastique Fantastique will clear the volitions, unlearn you of the learnt, speak upside-down, and create new worlds from the debris of your ruined memories. A further station has been assembled for it has become CLEAR to all involved that indeed NIGHT IS ALSO A SUN. A ritual of a kind will take place, but before this performance you may, if you dare, divest yourselves of your own habitual modes and configurations. An exercise in de-programming, a TECHNOLOGY of re-singularisation. In order:

First protocol: Clearing the Volitions (do you want this?).
Second protocol: Unlearning the Learning (as you act, so you are).
Third protocol: Speaking upside-down (scrambling the codes).
Fourth protocol: Making the world/destroying the world (until the absence of myth is the only myth).
